

decide,

IT Staffing / IT Problem Solvers

Decide has been delivering IT problem solving to its clients since 2004. Sometimes we create tools to make programming more efficient. Sometimes we deliver a better solution. We bring our different way of thinking to **IT Staffing**.

We understand these skills and know how to measure them. We understand and can deliver the talent you need for initiatives such as:

- .NET / ASP.NET / VB.NET / C#
- Mobile Development
- Java / J2EE
- Sharepoint
- SAP and Oracle ERP
- Cloud Computing
- Business Intelligence
- Project Management

Every IT Manager and CIO wants those individuals who not only have the technical know-how, but also possess the extra skills to get things done better, more efficient and can come up with the creative solutions.

A SEAMLESS EXTENSION OF YOUR TEAM

Decide's experience and reach ensures you can respond quickly to any change in your staffing needs with specialized talent and expertise you need. We tap into our pool of IT experts and integrate them with your team.

IDENTIFYING YOUR NEEDS

Decide's process begins with an extensive needs analysis. We work with you to determine where your organization requires additional expertise or manpower to make projects successful. We then make recommendations to fill the gaps to help you achieve your goals

Whether you need assistance with an important project or are transforming your IT framework to succeed with long-term goals, Decide can deliver the talent and experience you need.
